

ReVitalize ReEmploy ReEnergize ReEnvision ReNewYork

New York needs a new approach to energy

An approach that revitalizes our communities, cleans up our environment, and builds prosperity for the long term. We know it's possible. Green energy is affordable and available - right now - ready to create jobs for New Yorkers for decades to come.

What we need is a map for how to get there.

That is ReNewYork: The Green Energy Path to Jobs and Prosperity.

ReNewYork is a groundbreaking study to show how our state can move to a safe, clean and 100% renewable energy supply. The Alliance for a Green Economy (AGREE) and organizations throughout New York are asking the state to put just a little bit of our money where our mouths are to chart the way to a sustainable, prosperous future.

What will ReNewYork be?

ReNewYork will create a roadmap for a carbon-free, nuclear free energy future, covering:

- Renewable energy sources
- Efficiency and conservation
- Energy storage systems to ensure reliability
- Infrastructure upgrades to improve storm-resilience and recovery
- Financial costs for a range of energy scenarios
- Necessary state policies and programs
- Economic, environmental, and social impacts

ReNewYork will be rigorous and of the highest quality:

- Scientifically sound, conducted by leading researchers
- Guided and reviewed by independent experts
- Comprehensive, addressing electricity, heating, and transportation
- Whole-system approach, including energy and infrastructure
- Based on up-to-date data on New York energy markets and resources

With ReNew York, by 2015 we can have a roadmap to creating thousands of jobs, developing new industries, and revitalizing communities throughout New York - through building a truly sustainable, green economy based entirely on renewable energy resources.

All we need to do is start.

Find out more. Make ReNewYork happen. Join AGREE.
